

Ssn 1 Ep 23

## Shopping Online

Avoiding the common security pitfalls of online shopping, and desktop vs. mobile security issues.

### SHOW NOTES

:52: What are the potential pitfalls in placing orders on your smart phone?

2:41: If you are already signed onto Amazon on your smart phone and someone gets ahold of your phone, can they gain access to your payment information on your Amazon account?

3:59: Amazon is fairly safe to use, what about an online company you've never purchased from before—protocols for entering payment information and purchasing safely on your smart phone.

5:20: Is your desktop a more secure environment to purchase from than your smart phone?

6:43: Using paypal or venmo with your smart phone.

7:40: Case incident of how easily you can pick up a virus or malware on your phone.

9:37: Case incident of an ad company that the Weather Underground app was using, that was pushing unwanted downloads to Weather Underground's users.

12:40: Basic recommendation for safe online shopping.

13:35: Discussion of PayPal usage on your phone.

13:50: Alerts from PayPal and Amazon if someone is trying to log in from unusual geographic locations.

15:18: Brief review on current protocols for safe passwords and multi-factor authentication.
